

FBA-25A Installation

The **FBA-25A** allows operation of Vertex Standard VHF/UHF hand-held transceivers using six "AA" alkaline dry cells as the power source.

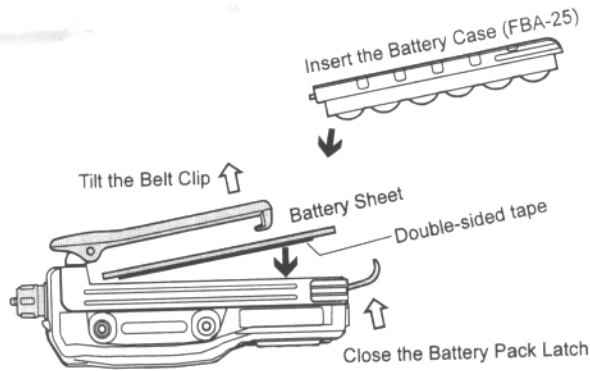

The supplied "Battery Sheet" is only used with the **VX-800** Transceiver; it is not required for use with other transceivers. The "Battery Sheet" ensures a snug fit of the batteries in the **FBA-25A** when used with the **VX-800**.

To Install the Battery Sheet:

Remove the backing from the double-sided tape on the Battery Sheet, and insert the Battery Sheet into the battery compartment, with the tape side facing downward, as shown in the drawing.

Affix the Battery Sheet and **FBA-25A** Battery Case into the battery compartment on the back of the radio by tilting the Belt Clip outward.

Now close the Battery Pack Latch until it locks in place with a "Click."

When using a rechargeable battery pack, not the **FBA-25A**, be sure to remove the Battery Sheet from the battery compartment. Store the Battery Sheet in a safe place, as it must be used whenever the **FBA-25A** is installed.

Caution

Do not affix the double-sided tape to the sides of the dry cell batteries installed in the **FBA-25A**!

付属のスポンジシートは、国内モデルには使用しません。
