With the Tectalk you stay in connection with your partners on 8 channels. With the FM Radio (87,5 - 108 MHz) you can listen to the news and musik. The device has UKW radio and vox-function (voice control), which enables you a communication without having to press the PTT-button. Furthermore with this function your are able to use the device as babysitter or room monitor. The call-function offers you a choice of 7 sounds. The search-function makes it easy for you to find a free channel.

Further equipment characteristics: 500 mW power output • scan function (search) • 38 CTCSS-tones • 2-channel-control (Dual watch) • battery indicator and automatic power saving function • socket for various headsets • produced according to EU-standard PMR 446
